WORK EXPERIENCE

Frontend Developer – Hadiawada Creative Portfolio Platform
🔗hadiawada.com   02/2025 - 03/2025

- Developed a responsive artist portfolio platform with Vue 3
- Designed reusable UI components, ensuring consistency across devices.
- Improved site performance by applying Vite build optimizations.
- Implemented SEO best practices (meta tags, schema markup, sitemap, Open Graph tags).
- Optimized page speed and accessibility, increasing chances of ranking on the first page of search results.

Frontend Developer (Contract) – Parking Management App
🔗 parkandfetch.com   01/2025 - 02/2025

- Built responsive UI components with Vue 3 Composition API and Tailwind CSS.
- Integrated real-time data updates for parking slot availability.
- Enhanced UX by improving navigation flow and reducing page load times by 30%.

Lead Frontend Developer – Delivaz Multi-Vendor E-commerce
🔗 nuxt-delivaz.netlify.app   1/2023 - 11/2024

- Led frontend architecture for a multi-service platform (food, retail, laundry, digital goods).
- Implemented QR code payment integration and scalable frontend design.
- Optimized performance using lazy loading and code splitting, boosting Lighthouse score from $70 \rightarrow 95$.
- Designed and implemented the application using Nuxt 3 for scalability, SSR, and SEO-friendly rendering.
- Collaborated with backend and product teams to ensure high availability and responsive UX across devices.
